A Brief Review on New Naturally Occurring Cembranoid ...
This work reviews the new isolated cembranoid derivatives from species of the genera Sarcophyton, Sinularia, and Lobophyllum as well as their biological properties, during 2016-2018. The compilation permitted to conclude that much more new cembranoid diterpenes were found in the soft corals of the genus Sarcophyton than in those belonging to the genera Lobophyllum or Sinularia.

Shape memory alloys remember their shape due to thermoelastic martensitic phase transformation. These alloys have advantages in terms of large recoverable strain and these alloys can exert continuous force during use. Equiatomic NiTi, also known as nitinol, has a great potential for use as a biomaterial as compared to other conventional materials due to its shape memory and superelastic ...

In 2016, it was clear only a few people in the lefty media world understood what Trump was up to, and why he was a real threat to win. Michael Moore was one, and Frank was another. I don't think it's a coincidence both were Midwesterners. Frank released his next book, Listen, Liberal, in May of 2016, just as Trump was seizing the nomination ...
