Freedom 15 Inverter/Charger bad????????? - iRV2 Forums

The Freedom 20 has a problem with the inside circuit boards coming loose. Heart/Xantrex uses small wire ties inside to "hold" the board connections together. That is why 4 years ago when the tech banged the side it started working. Disconnect the battery cables and all other connections and take the case off the unit.

For 32 Volt models, recharge batteries to 41.38 Volts. Freedom units will automatically reset when shore power is disconnected or reset manually by cycling the power switch OFF/ON Shut down also occurs for a high battery condition at 15.5 Volts. To restore inverter operation, battery voltage must be below 15.5 Volts.

OWNER'S MANUAL - Power Inverter, Inverter Charger ...

My Heart Freedom 20 Charger / inverter is not charging. I replaced the four 6 volt batteries that went south during the winter and now the inverter seems to not charge correctly. The Batteries are connected in two twelve volt systems. I am only getting a charge of 12. 5 on both banks. What am I doing wrong or is it a wiring or inverter issue.

I have the heart interface inverter/charger on my hunter 42 passage 1995. when got it, I had to through the two house batteries and got instead, two gel cell batteries (the blue ones). AFTER buying the batteries I read on the heart manual that it needs to be reprogrammed for gel cell batteries which can be done only with "remote control".
