KENWOOD Equipment Modifications List - WB4HFN

With the slow rate tuning modification above, the dial increments become 250Hz per division. You may desire to switch the new reduced tuning rate on and off. For example, you can select the new rate on just VFO B by using an unused section of the FUNCTION switch to make or break the circuit on diode D-13.

Modifications for the Kenwood TS-930 - QSL.net

Modifications for the Kenwood TS-450. A common problem when using a KAM-Plus multimode with the Kenwood TS-850 or TS-450 occurs when the KAM-Plus is coupled to the Accessory-2 socket on the back of the transceiver, producing noticeable distortion of the transmitted audio when using the microphone in SSB mode..
