First, let us clear out  
the "/2" by multiplying  
both sides by 2.

Because we are  
multiplying by a  
positive number, the  
inequalities will not  
change.  $x - 32 \times 2 < -5$   
 $\times 2$  .  $x - 3 < -10$ . Now  
add 3 to both sides:

$$x - 3 + 3 < -10 + 3 \text{ . } x$$

File Type PDF Use  
Both Sides Of The  
Brain By Tony  
 $x < -7$ . And that is our  
solution:  $x < -7$

## **Solving Inequalities**

The common transposition method is to do the same thing (mathematically) to both sides of the equation, with the aim of bringing like terms together and isolate the variable (or the unknown quantity). For example:  $5x + 8 = 3x - 6$ . We want to get rid of the number 8 from the

# File Type PDF Use Both Sides Of The Brain By Tony

left side. So we subtract 8 from both sides of the equation.

## **Isolate A Variable (Transposition) - solutions, examples**

...

Flank pain is pain that occurs on either or both sides of the torso, just below the ribs. The most common reason for flank pain is a muscle strain, but there are other possible underlying

The right hemisphere controls your body's left side, and vice versa. When you use the left or logical side, you are being analytical, attentive, objective and rational. This is the part you use to process language, facts, science, math and strategies. The right side, however, is driven by feelings, beliefs, imagination
