### What A Plant Knows A

"What a Plant Knows is lively, eloquent, scientifically accurate, and easy to read. I commend this engaging text to all who wonder about life on earth and seek a compelling introduction to the lives of plants as revealed through centuries of careful scientific experimentation."

### What a Plant Knows: A Field Guide to the Senses: Chamovitz ...

What a Plant Knows is a very brief survey of research into plant senses and awareness: a bare 120 pages divided into sections on sight, hearing, smell, touch, proprioception, and memory. A fascinating subject, to be sure, but too shallowly and sketchily treated.

### What a Plant Knows: A Field Guide to the Senses by Daniel ...

A plant needs to know if another plant has grown above it, filtering out the light for photosynthesis. If a plant senses that it is in the shade, it will start growing faster to get out. And plants need to survive, which means they need to know when to "hatch" out of their seeds and when to reproduce.

### What a Plant Knows: A Field Guide to the Senses: Updated ...

What a Plant Knows is a rare inside look at what life is really like for the grass we walk on, the flowers we sniff, and the trees we climb. It is a true field guide to the senses for science buffs and green thumbs, and for anyone who seeks a greater understanding of our place in nature.

### What A Plant Knows

What a Plant Knows is a popular science book by Daniel Chamovitz, originally published in 2012, discussing the sensory system of plants. A revised edition was published in 2017. Judiciously manipulating similes with dashes of anthropomorphism, Chamovitz introduces each of the vital human senses (all except taste) and explains its meaning for humans as contrasted with its function in plants.

### What a Plant Knows - Wikipedia

Plants 'know' they are under attack buy the insect. They 'communicate' with other plants near them letting them know of the dangers. As a result of this communication Plant B defends itself. Here is what really happens. Plant A does not 'know' insects are eating its leaves – it would need to have a brain to 'know' anything.

### What A Plant Knows - book Review by Garden Myths

June 22, 2012 • Plants have the uncanny ability to send their roots down and their shoots up, even if the seedlings are rotated. The plants are sensing gravity. The plants are sensing gravity ...

### What a Plant Knows : NPR

10WHAT A PLANT KNOWS that gives us sunburn and infrared light that heats us up. Plants can tell when there's very little light, like from a candle, or when it's the middle of the day, or when the sun is about to set into the horizon. Plants know if the light is coming from the left, the right, or from above.
